

ANSWER KEY

The only false statement is, Morgan will eventually reach zero seconds.

Your graph should look similar to Morgan's. Your starting time may be higher than Morgan's depending on your texting ability and your keyboard. You might have to change the scale to start at 90-120 seconds. Your graph should eventually level out. It will be harder and harder for you to improve your time. Maybe you will get below 15 seconds with lots of practice.
